

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

JUN 20 2008

OFFICE OF PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

Bryan Arroyo  
Acting Assistant Director for Endangered Species  
U.S. Fish and Wildlife Service  
1849 C Street, NW  
Washington, D.C. 20204

Dear Mr. Arroyo:

The Office of Pesticide Programs (OPP), U.S. Environmental Protection Agency (EPA) respectfully requests the initiation of Endangered Species Act (ESA) section 7(a)(2) formal consultation under 50 CFR Part 402.46, Optional Formal Consultation Procedures for FIFRA Actions. This consultation request addresses the potential effects of pesticides registered under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) and containing the active ingredient **1,3-Dichloropropene (telone)**, to the California Red-Legged Frog (CRLF) (*Rana aurora draytonii*). Our assessment resulted in a determination that the use of pesticides containing telone is *not likely to adversely affect* the CRLF directly or indirectly. Further, we have determined that registered uses of pesticides containing telone will not alter primary constituent elements of the CRLF critical habitat and therefore, there will be no habitat modification.

This assessment was conducted consistent with the scientific procedures outlined in the Agency's Overview Document<sup>1</sup> and reviewed by the U.S. Fish and Wildlife Service (FWS) and National Marine Fisheries Service<sup>2</sup>. The effects determination was made by staff in the Environmental Fate and Effects Division (EFED), who have been trained by FWS and certified to make effects determinations. Further, the attached assessment and effects determination has undergone review by our internal Peer Review Panel, which included one or more reviewers also trained by FWS and certified to make effects determinations. As you are aware, after having carefully reviewed the Overview Document, FWS concluded that EPA's ecological risk assessment process "will produce effects determinations that reliably assess the effects of pesticides on endangered and threatened species [] and critical habitat pursuant to Section 7 of

---

<sup>1</sup> U.S. EPA. 2004. Overview of the Ecological Risk Assessment Process in the Office of Pesticide Programs. Office of Prevention, Pesticides, and Toxic Substances. Office of Pesticide Programs. Washington, D.C. January 23, 2004.

<sup>2</sup> USFWS/NMFS. 2004. Letter from USFWS/NMFS to U.S. EPA Office of Prevention, Pesticides, and Toxic Substances. January 26, 2004. (<http://www.fws.gov/endangered/consultations/pesticides/evaluation.pdf>)

the [ESA] and [its] implementing regulations”, and that “this approach also will produce all information necessary to initiate formal consultation where appropriate.”

The scope of this assessment is consistent with a stipulated injunction which resolved litigation brought by the Center for Biological Diversity against EPA under the Endangered Species Act. As a result, this assessment focuses only on the California red-legged frog. EPA acknowledges that use of pesticides containing telone is not limited to the geographic scope of this assessment and that in the future, potential risks to other listed species will need to be evaluated by EPA.

As the US Fish and Wildlife Service requested of EPA, this assessment contains an appendix that arrays information regarding certain public literature, by effect. For your convenience you may access the Code List for ECOTOX at <http://cfpub.epa.gov/ecotox/blackbox/help/codelist.pdf> . This Code list describes and defines all the codes used in the ECOTOX system including those to describe various types of effects.

As agreed to in the past, the subject assessment and effects determination, attachments and appendices may be accessed by your staff from our Web site at <http://www.epa.gov/oppfead1/endanger/litstatus/effects> within the next several days. Please let me know if you have any questions regarding this request or the materials we have developed to initiate formal consultation.

Enclosures

Sincerely,

Arthur-Jean B. Williams, Associate Director  
Environmental Fate and Effects Division (7507P)
